## OBJECT OF THE PROJECT

### OBJECT OF THE PROJECT

Improve the level of media competence -and its awareness- among high school students from Catalonia, Croatia, France, Greece, Ireland, Portugal and Slovakia through the implementation of an interactive evaluation and training tool developed as an open access website, available in different languages (initially, DE, IE, EN, CAT, FR, HR, PT, GR, ES and SK).

After testing this tool (pre-pilot and pilot phases), it will be freely, as a training resource for other students and educators in their respective contexts.
